

ROTATE YOUR LIFUS METHOD, ENHANCE THE OUTPUT

Line Flying Under Supervision (LIFUS), or Line Training is a trusted and vital instrument in the development of positive flight crew behaviour, and their commitment to your organisation.

But training potential and reality sometimes don't align. This LIFUS Booster Program is intended to re-energize the staff that you entrust with line-training, making sure they have the right tools, skills and willingness to provide a valued training and strengthen the core of your flight operations for the long run.

We understand that you need flexibility when training new pilots. That is why the LIFUS Booster Program is bespoke to your organisation. Together we determine the best course of action to rejuvenate your line training program from the bottom up, keeping your flexibility intact.

Flight experience alone is not enough to create qualitative line training, your trainers need much more than that. This LIFUS booster program gives them the tools for this.

**"After training so many
new pilots in our company,
I kinda lost my fire.**

**This training lit it all up for
me again"**

- participant feedback

Our LIFUS Booster Program

Our philosophy is that a well structured line training should represent a normal 'day-in-the-office' - with a focus on SOPs and crew/company interaction. Not a mini type initial, or a demonstration of superior knowledge.

Our booster program is based on a variety of modular elements that can be combined into a bespoke program. We start by analysing. Together with your Training Manager we check your existing LIFUS methods and compare the documented version against the reality, requirements and industry standard. You decide what training elements fit your organisation best, and will lead to an optimum result.

Included in each program is a refresher training on teaching methods and evaluation techniques for your training staff. In an interactive, engaging and fun method we renew existing skills and motivation. Focussing on the NOTECH and human factors knowledge of your instructors. After all, no person is alike - and every pilot reacts different to training opportunities.

The supplemental modules delve deeper into your existing methods, aiming to improve the entire process. From the instructors workflow and documentation to methods to objectively analyse trainee pilots.

For example, did you ever think on engaging your senior first-officers in the line training programs of junior colleagues? We did, and we developed a method that cuts on both sides. Early engagement of junior pilots in the training cycle results in longer employment ratios for your organisation. In a time of pilot shortage that is just invaluable.

We understand that you need your pilots in the air. That's why you can opt-in for a hybrid training method. The program remains the same, but we simply engage your staff also via online training. Additionally we offer on-the-job training for your staff.

Respect the training, honour the commitment, cherish the result!

A thoroughly structured and well organised Line Training program results in longer employment ratios for your organisation.

Quick info

Program Modules

- Teaching methods
- Maintaining CRM principles during LIFUS
- Do's and Don'ts during normal operation
- The normal growth curve of a pilot
- Providing feedback to task-oriented people
- Training workflows
- Documentation of LIFUS
- Assessing staff

Course Material and Standards

This course is provided in compliance with EASA standards, however the authorization as Line Trainer can only be issued by your organisation.

Usually the course is provided as a one-day course with optional add-ons for the organisation.

Participants will receive:

1. Handouts on the presented topics,
2. LIFUS Trainer Manual,
3. Course certificate.

Target Audience

This interactive and practical course is specifically designed for staff nominated for Line Training.

Investment

- Theoretical Training: 2 days, supplemented with Operator Specific training depending on requirements.
- Free analysis included, send us your existing program and we make a tailored offer.
